N.Özer Bilgi

Proje dokümanında 2 örnek database verildi. Bu iki database kullanıcıların ihtiyaçları doğrultusunda birleştirildi. Yeni tablolar ve bu tablolara gerekli alanlar eklendi. Primary Key'ler ve Foreign Key'ler, tablolar arasındaki ilişkiler çerçevesinde oluşturuldu. Aramada kolaylık sağlaması açısından Index ler belirlendi ki bu oluşturulacak queryler ile veri çekmemizde response time'ı azaltmamızı sağlar. Uniqe alanlar belirlendi, böylece bilgi kirliliğinin önüne geçerek performansı artırmak hedeflendi.

Proje edindiğimiz bilgileri kapsamlı bir projede uygulama imkanı ve veritabanı ile ilgili işlemlerin yürütülmesi sürecini gözlemleme imkanı sunuyor.

```sql
insert into Members (MemberId,DateJoined,DateOfBirth,EmailAddress,FirstName,LastName)
values (1,'2014-12-30','1988-09-29','n.ozerbilgi@gmail.com','Ozer','Bilgi')

update Members set MemberId=2, DateJoined='2014-11-12', DateOfBirth='1988-09-29',
EmailAddress='ozerbilgi@hotmail.com.tr', Firstname='Nurullah', LastName='Bilgi' where
MemberId=1

delete from Members where MemberId=2

Select FirstName from Members where FirstName Like'N%'
select DISTINCT FirstName, LastName from Members ORDER BY FirstName,LastName DESC
```

```sql
